What do you need for the quarterly update of my website?

Simple Web designs on line helps you create a simple and unique website that will help your company have web presence by placing your company on the World Wide Web.

OUR GOAL:

Our goal is to help you to design and maintain your simple and unique website to suit your purpose without breaking your pocket. Your simple web design contains our standard basic 4-5 pages static website with your unique content-logo, pictures and wordings.

We will help you keep your website current and updated with the quarterly updates.

We have included the cost for this quarterly updates in your initial web design cost package and also in the yearly renewal fees so you do not have to come out of pocket at any time during the year for updating fees.

Website content.

CONTENT on your website **SHOULD ALWAYS BE CURRENT**. Our design philosophy is to enable us update the content of your website every 3-4 months to add new information or pictures to keep your content updated so that the information on your website is always fresh and current.

Whether you wish to post your company news on your home page or put your special offers or sales items for the quarter or new pictures of your last board meeting or latest products or new personnel or company premises, you will always have something new on your website each quarter so that anytime visitors come to your website they always find something new has been added or changed on your website.

An outdated site looks abandoned and does not give a good impression of good business to visitors. Most people have their websites designed and then do not update it and this instead of promoting their business actually makes them loose more clientele.

Quarterly Updates:

PLEASE NOTE: Quarterly updates are just for adding new information and a few new pictures to give a fresh look to the site and not to change entire content of pages or web design of your website.

We will need you to send to us any latest company information or pictures you wish to add to any of the pages of your website for each quarter.

If you do not have any new information you wish to add any quarter we will simply re arrange the wordings on the home page of your website to make the presentation of your home page look different for that quarter and notify you via email of the website update.
